

# Chris Repich

---

I'm an experienced project manager that understands how daily decisions impact a business' bottom line, the team's capacity, and the customer's experience. Looking to join a collaborative team where I can help designers, developers and stakeholders get projects across the finished line.

## Experience

---

### **Level 2 Onsite IT technician**

**Atarabio/Sage Networking and Communications | 2021 - 2022**

As an onsite technician at Atara Bio's Executive location, I used ServiceNow and Teamviewer to help track and solve end-user issues. I optimized the rest of the team's workflow, created SOP's, and managed their inventory system.

### **Computer Networking Systems Engineering Mentor**

**Moorpark College | 2021 - 2022**

Working as a paid mentor in the Moorpark College's Impacto program has allowed me to share the time management and task juggling skills that I have acquired throughout schooling, work, and my personal life.

### **Scrum Master - Remote - Contractor**

**People in Tech | 2021 - 2022**

At People In Tech, we built mobile and web applications from scratch. This role requires me to be sensitive to clients' budgets while maximizing the core functionality of the products that we build.

### **Program Manager**

**Virtually Testing Foundation | 2020 - 2022**

While working at this non-profit, I was in charge of overseeing all of Virtually Testing's Help desk. I also established a team to manage multiple 10-week internships consisting of 1,000 interns.

## Education

---

### **Cyber Security A.S.**

*Moorpark College*

### **Computer Networking Systems Engineer A.S**

*Moorpark College*
